### ***Specification***

1. The disclosure is objected to because of the following informalities: Applicant refers to a specific claim in the specification (page 3, line 7), which will cause confusion later on during examination of application because claims are subject to cancellation and during further prosecution of application.

Appropriate correction is required.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-14 of U.S. Patent No. 6,553,024. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the limitations of claims 1-5 are encompassed in claims 12-14 of US Patent No. 6,553,024.

***Allowable Subject Matter***

4. Claims 6-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: Although the combined prior art discloses a routing data in a switching network whereby the architecture includes plurality of line units, interface modules which include plurality of interface units and DTMF detectors wherein information is transferred in two directions and switching data between line units they fail to teach/suggest a switching unit that includes a PCM line unit which includes an assembly switching network module for switching data packets over a PCM interface, and DTMF recognition unit in association with a conversion unit that includes an evaluation unit, which produces evaluation results for routing information, volatile memory containing first/second sub-area used for storing logical network identifiers for identifying data network interface and communication device connected to a LAN, and optical display.
